

CYCLE INDICATORS

Model DCI-TO/DCI-L/DCI-D

Name: Cycle Indicator Literature
Revision: 1.0 | Revision Date: 17-APR-2019
Created By: Ray Garcia
File Name: NEW_CI_LIT_APR2019

DESCRIPTION

The DELIRON Cycle Indicator is a cost-effective and easy to install lubrication monitoring device. It has a custom machined stainless steel housing and a powerful internal magnet assembly built for industrial use.

The Deliron Cycle Indicator is totally sealed and can accurately monitor fluid or grease systems. It can also be installed on any section or side of the divider block assemblies. The highly visible indicator has a snap-action movement which makes it easy for the user to see as well as determine the precise timing of each divider cycle.

FEATURES

- Highly Visible
- Stainless Steel Housing
